

2.5# with Sel-Plex

Product Description: Complete vitamin and trace mineral product for market hogs from 40 lb to market.

Pack Size: 50 lb bag

Use Rate: 2.5 lbs per ton

Features: A complete source of vitamins and trace minerals necessary to maintain efficient pig production under commercial swine production conditions.

This premix is designed to meet the needs of modern lean genotypes. It is formulated and manufactured to exacting specifications to promote efficient pig growth and optimum carcass composition. Feed intake and lean growth rate changes of commercial genotypes has necessitated different inclusion rates of some vitamins and minerals.

Purpose: Supply the necessary vitamin and trace mineral micronutrients to promote optimum growth in commercially reared market hogs.

Performance Benefits:

- Support normal cellular activity and essential metabolic enzyme activity.
- Supports efficient growth performance by supplying the appropriate levels of vitamins and minerals necessary to achieve the lean gain potential of modern genotypes.
- Supports immune system competence by supplying minerals and vitamins at the higher levels required by pigs reared in stressful environments.

Remarks: Feed as recommended by your Omega Nutrition representative.
