

PROZYME PLUS
PIG TRANSITION PAK

Product Description:

A new nutritional add pack combining the latest technology in baby pig nutrition, and formulated to improve the performance of nursery pigs from 15 to 50 pounds fed rations containing high levels of soybean meal.

Pack Size:

50 lb. Bag

Use Rate:

10 lbs. per ton

Features:

Contains an enzyme blend that enhances the digestion and utilization of soybean meal by the pig. In addition, it contains both Yeast culture and Lactobacillus microbes, and is fortified with the latest in digestive enhancers and mold inhibitors.

Benefits:

- Eases the transition of pigs from pelleted diets to grind and mix rations containing high levels of soybean meal.
- Increases energy value of soybean meal resulting in less digestive upsets, gas production and stool looseness
- Increased palatability resulting in improved feed intake, ADG and feed efficiency.
- Decreases gut pH, enhancing gut activity and pig digestion, while decreasing the presence of pathogenic bacteria.
- Reduces the negative effects of mycotoxins, thus improving animal performance and livability.
- Allows the flexibility of formulating less complex rations by reducing the levels of dried whey, fishmeal, fat, and oat products, while increasing soybean meal levels.

Remarks:

Prozyme Plus is intended for meal rations and should not be pelleted.
