

Safe Start 25-50

Description: 4th stage starter diet for young pigs. This diet is manufactured at the farm, or toll-milled, using customized formulas similar to those below.

Use Rate: 34 lbs per pig, or as recommended by your Omega Nutrition representative.

- Features & Benefits:**
- Economical diet that completes the Safe Start Nursery Feeding Program and transitions the pigs to grow-finish diets.
 - Less complex diet suited to your individual needs.
 - Utilizes the latest nutrition technology to aid pig growth performance at a similar cost of production.
 - **Omega Transition 25 Premix** contains essential amino acids, vitamins, trace minerals, enzymes, and microbials. This product is used when limestone, phosphate, and salt are separate ingredients.
 - **Omega Transition 15 Pack** contains the necessary enzymes, amino acids, and microbials for use with a vitamin & mineral basemix. The **Omega 50# Basemix** completes the Safe Start 25-50 diet with the Transition 15 Pack.
